

Replacement Cartridge PneuMAX Composite filter

PneuMAX 100% Synthetic Composite filters provide dramatic improvement in operating pressure drop,

Higher efficiency and lower operating pressure than the recommended OEM filter.

Did you know that the OEM brand filter has media designed for pulse style self-cleaning systems? PneuMAX filters are specifically designed as a static style filter.

PneuMAX Benefits

- Up to a 50% less initial operating pressure drop
- 100% E1 efficiency on 0.3-1.0 micron particles
- 100% average arrestance
- High dust loading capacity
- Extended life.

PneuMax Composite Filters

- Hydrophobic (repels water)
- More Aerodynamic flow
- Lower pressure drop
- Improved dust holding

OEM Paper

- Hydrophilic (absorbs water)
- Loses rigidity
- Collapses during exposure to

PneuMAX Filters are also available with replacement pre-filter components:

- 100% Synthetic depth loading inner pad P/N E102361, replacement for Donaldson P/N 19-0847
- Spring Retainer Strip S52508A1, replacement for Donaldson P/N P19-0883
- 100% Synthetic depth loading inner sock P/N E102228 Fully sewn filter sock with disc bottom. (not offered by Donaldson)
